TECHNICAL STAFF

Items of Interest -- Week of 7-11 May

25X1

25X1

Note on this

1. [] reports that NPIC will, within the next few weeks, retire all data older than two years from the NDS. NPIC has provided [] with a microfiche copy of all data to be retired. The data are sorted by MRN and the total deck is less than six inches deep. Future retirements are expected annually. []

2. [] and I visited Richards Corporation in Vienna (Virginia, of course) last Thursday. OIA has an order for [] 2x9 split format light tables with Richards to be delivered in early fall. The company has grown from a home garage-based operation to a million dollar business employing about 105 people. Richards does all their own engineering, design, testing, machining, metal work, and fabrication within their Vienna facility. Their production line is currently working on [] light tables for NPIC. []
